About Us

SIMPOR PHARMA SDN BHD, a pioneer manufacturer and contract manufacturer based in Brunei Darussalam, is built to the global standards of pharmaceutical industry.

Simpor Pharma has a new milestone for Brunei Darussalam - as the first GMP and Halal Pharmaceutical manufacturing company in Brunei, aiming to meet certifications from various authoritative organizations.

Our Vision

SIMPOR PHARMA SDN BHD shares the same objective with the Government of Brunei Darussalam; becoming the global leader in the Halal industry for pharmaceutical products, health supplements, as well as cosmetics.

Simpor Pharma also aims to deliver customized services to meet global contract manufacturing needs, providing cutting edge technologies that are ready for all manufacturing requests, along with private labels.

Other specialized services for manufacturing and private labels include colour coatings, logo printing, packaging and labelling.

Simpor Pharma will become a significant player for exporting Halal pharmaceutical products, Health Supplement & Cosmetics in Brunei, Asia and around the world.

Quality Control

Our GLP-compliant Quality Control Department equipped with high-tech instrumentation of international standards ensures that all our products and processes are in conformation to national and international standards.

These highly advanced instrumentations are staffed by an experienced and highly-skilled workforce.

Chemical Testing

The laboratory contains the latest testing equipment needed for the verification of chemical compounds in raw materials and finished products. Much of the analyses involved include the use of equipment such as:

- ICP (Inductively Coupled Plasma Optical Emission Spectrometer)
- UHPLC (Ultra High Pressure Liquid Chromatography)
- TOC (Total Organic Count)
- GC (Gas Chromatograph)
- FTIR (Fourier Transform Infrared Spectrophotometry)
- UV/Vis (Ultraviolet / Visible Spectrophotometry)
- Titrimetric and Potentiometric assays
- Moisture, Friability and Harness Testing
- Disintegration & Disolution Test
- Stability Test

Microbiological Testing

Simpor's standard practice is to do microbiological testing on all raw materials and finished products to the current USP standards. The microbiology laboratory is segregated within the main manufacturing facility. Its primary function is to verify the absence of harmful bacterial and other microbial contamination.

- Total Bacteria Count
- Total Yeast and Mold Counts
- Testing for and identification of: *Staphylococcus aureus*, *Escherichia coli*, *Pseudomonas*, *anaerobic bacteria*, *Clostridium perfringens* and *Clostridium species*

Quality Assurance

Simpor Pharma has an established and rigorously enforced Quality Management System covering every aspect of manufacturing.

Halal

Being the first Brunei's Halal Pharmaceutical where the entire plant is Halal certified, Simpor Pharma's objective and importance is to assure products manufactured are halal according to the Islamic Law to meet the demand of Muslim customers not just locally but globally as well.

Only Halal materials are used in all production, and anything haram are strictly prohibited to avoid cross contamination. As a manufacturing company that strictly follows GMP, Simpor Pharma has a dedicated Halal Management Team who develop, implement and maintain Halal Assurance System - a system that is not only GMP-compliant but also ensures the integrity of Halal products, from acquisition of raw materials to the production of finished products.

Halal Assurance System

Customized Services For All Your Needs

Simpor offers contract manufacturing for products in many dosages. Custom requests for manufacturing, along with private labels, are also available for Nutraceuticals, Pharmaceuticals, and Cosmetics.

All Simpor Pharma products are proudly made in Brunei Darussalam under rigorous quality controls, measured by the most current GMP standards and adhering to the strictest Halal guidelines and practices.

- Research & Development (Formulation)

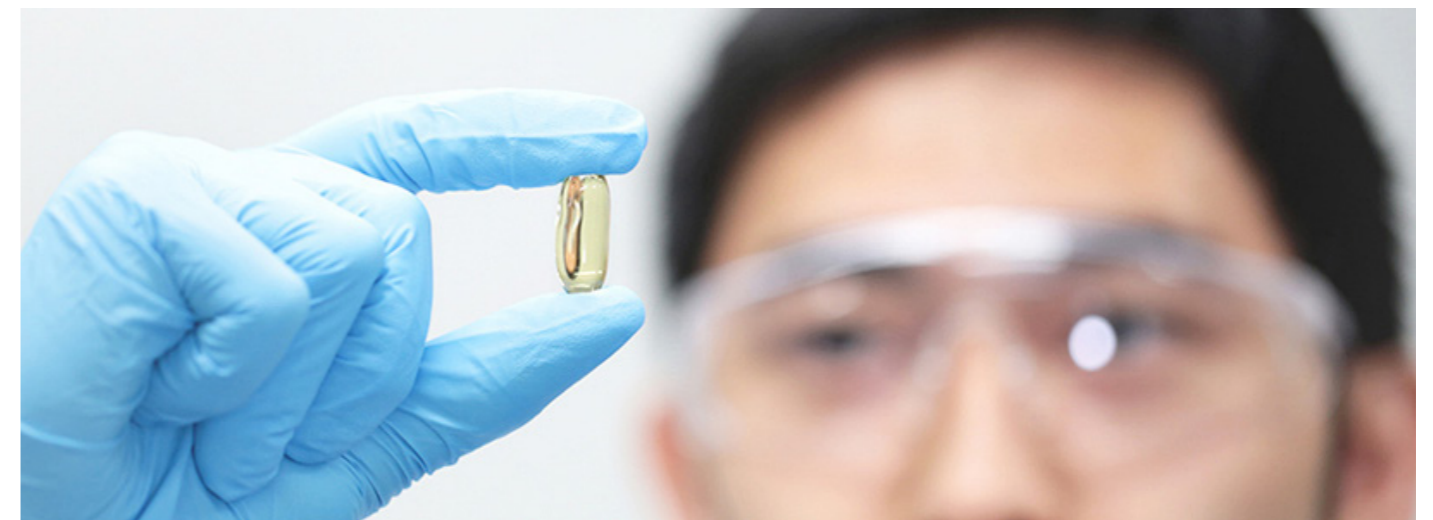

Manufactured products include:

- Over-the-counter (OTC) medicine
- Generics and Ethical drugs
- Health Supplements
- Cosmetics

Products include:

- Softgels
- Tablets
- Hard Shell Capsules
- Powders & Granular
- Oral Liquids
- Creams & Gels

Regardless of format, Simpor Pharma has the complete capabilities to successfully produce and deliver the finished goods at the standards expected and exceeding those set by clients.

Facilities

The whole plant has been constructed with customized structures that meet the pharmaceutical requirements (PIC/S, Guide to Good Manufacturing Practice for Medicinal Products) for design, construction materials, HVAC, Purified Water and utilities. The manufacturing areas are all controlled in Class 100,000 Cleanroom standard as per the requisite classification norms.

All laboratories and equipment follow strict rules for complying with government

regulations, PIC/S GMP, and contractual obligations. On-site laboratories include chemical, microbiological and R&D perform tests on all incoming materials, in-process products, validations and finished products as well as environment tests.

Everyday, dedicated employees of the plant contribute their know-how to guarantee the highest quality in all stages of production.

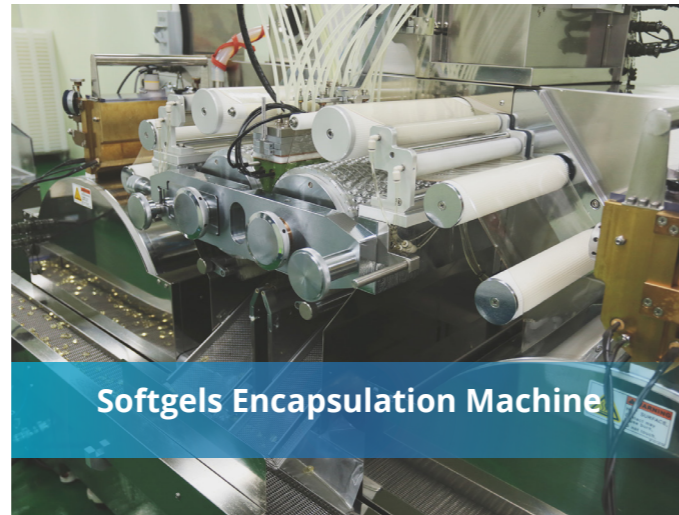

Adequate temperature controlled warehouse space has been made available to handle incoming raw and packaging material, in-process stocks as well as storage of finished products. Warehouse access is restricted to designated personnel, security cameras have been installed and the flow of materials follows corporate procedures throughout raw material sampling, quarantine, releases, issuance to production and finished product storage.

Fluid Bed Granulator

High Shear Granulator

Softgels Encapsulation Machine

Bin Blender

Cream Mixing Machine

Hard Shell Capsule Encapsulation Machine

Tablet Press Machine With Metal Detector

Fully Automatic Bottle Packaging Lines

Coating Machines

PRODUCTION CAPABILITIES

40 Million

Softgel capsules per day

PRODUCTION CAPABILITIES

20,000 Tons

of Powder & Granular per annum

Softgels & Gelatin Shells

Types:

- Regular Softgels
- Chewable Softgels
- Cosmetic Softgels
- Enteric Coated Softgels
- Bovine Gelatin Softgels
- Fish Gelatin Softgels

Advantages:

- Better Bio-availability
- Higher Absorption Rate
- Easy To Swallow
- Elegant Appearance
- Superior Odor Masking
- Longer Shelf Life

Powders

Types:

- Regular Powders
- Fine Powders
- Effervescent Powders
- Granular

Advantages:

- Water Soluble
- Rapid Absorption
- Concentrated Liquid
- Multi-purpose

PRODUCTION CAPABILITIES

50 Million
Tablets per day

PRODUCTION CAPABILITIES

10,000 Tons
of Liquid per annum

Tablets

Types:

- Core Tablets
- Chewable Tablets
- Film Coated Tablets
- Sugar Coated Tablets
- Moisture Shield Coated Tablets
- Enteric Coated Tablets
- Effervescent Tablets
- Sustained Release Tablets

Advantages:

- Large Variety Of Compositions
- Broad Range Of Shapes and Sizes
- Multiple Use And Functionality

Oral Liquids

Types:

- Calcium Enriched Drinks
- Iron Enriched Drinks
- Vitamins Enriched Drinks
- Omega Drinks
- Energy Drinks
- Vitamin D Drinks
- Herbal Drinks
- Isotonic Drinks
- Customized Drinks

Advantages:

- Faster Absorption Than Solids
- Palatable
- Better For Consumers Who Have Trouble Swallowing Than Others

PRODUCTION CAPABILITIES

7.2 Million
Capsules per day

PRODUCTION CAPABILITIES

324 Tons
of Cream & Gels per annum

Hard Shell Capsules

Types:

- Regular Gelatin Capsules
- Vegetarian Capsules
- Fish Gelatin Capsules
- Beadlet Capsules (Can be time release)
- Enteric Coated Hard Shell Capsules

Advantages:

- Quicker Lead Time
- Vegetarian Capsules are available

Creams & Gels

Types of Gels:

- Moisture Preservation Gel
- Eye Gel
- Lubricating Gel
- Anti-ageing Gel
- Anti-acne Gel
- Skin Smoothing Gel
- Customized Creams & Gels

Types of Creams:

- Anti-wrinkle Cream
- Anti-ageing Cream
- Anti-acne Cream
- Moisture Preservation Cream
- Eye Cream
- Day Cream
- Night Cream
- Skin Lightening Cream
- Skin Smoothing Cream
- BB Cream
